I. Priority Roadmap — 30 / 60 / 90 Days

A. Executive Summary

CRITICAL FINDING: Every page of broastsara.com returns identical HTML to crawlers. The site is a JavaScript Single-Page Application (SPA) with no server-side rendering (SSR) or static HTML generation. Google, Bing, all AI crawlers, and every answer engine see the same homepage content regardless of which URL they request — /menu, /faq, /locations, /blog, and /legal all return the homepage shell. This means the site currently has ZERO differentiated SEO value per page and is invisible to AI-powered search systems.

Broast Sara (بروست سارة) is a well-positioned broast and fried-chicken chain in Madinah Al Munawwarah with eight branches spanning Al Aziziyyah, Al Hijrah, Ad Difa, Al Jumuah, Ar Rawabi, Az Zahrah, Abiar Al Mashi, and Yanbu — plus confirmed listings on HungerStation, Waze, and Yango Maps. The brand already owns its primary positioning statement (أفضل برست في المدينة المنورة — 'best broast in Madinah'), communicates a 100% fresh halal credential, and lists a Food Safety Policy page in its navigation, demonstrating awareness of trust-signal requirements. These are genuine strengths that can be leveraged immediately once the technical foundation is fixed.

However, the website in its current state cannot rank on the first page of Google, cannot appear in AI Overviews (AIO), cannot be cited by answer engines (AEO), and cannot be surfaces by generative search (GEO) — because none of the sub-pages are crawlable as distinct documents. Beyond the SPA rendering failure, the site also lacks: unique title tags and meta descriptions per page, structured data / schema markup of any kind, individual branch location pages, FAQ schema, blog content, legal page content, NAP data in machine-readable form, hreflang declarations, canonical tags, Open Graph metadata, and mobile-first conversion elements such as sticky call buttons and platform-native order links. The gap between the brand's real-world presence and its digital footprint is enormous — and this is precisely where the opportunity lies.

This document provides a complete corrective roadmap: a page-by-page audit, the recommended site architecture, full content strategy for every page type, ready-to-implement page drafts with headings and copy, a keyword map with Arabic search terms, technical SEO requirements, AI-search optimization guidance, and a 30/60/90-day implementation plan. If executed with fidelity, Broast Sara can realistically achieve first-page rankings for its primary Arabic local keywords within 90 days, appear in AI Overviews and answer boxes within 120 days, and become the definitive digital authority for broast chicken searches in Madinah.

B. Full Site Audit

B1. Critical Technical Finding — SPA Rendering Failure

All six navigable URLs (/, /menu, /locations, /faq, /blog, /legal) return byte-for-byte identical HTML when fetched without JavaScript execution. This is the definition of a JavaScript-only SPA with no SSR or pre-rendering. Every subsequent audit finding in this section must be understood in that context: even where good content exists in the SPA, it is invisible to search engines and AI crawlers.

B2. Page-by-Page Audit Table

Page	Current Role	Strengths	Weaknesses	SEO Impact	AIO/AEO/GEO Opp.	Action
Home /	Brand landing & branch overview	Strong Arabic H1. Good brand keywords. Branch list. Menu categories mentioned. Halal claim.	No unique title tag. No meta description. No schema. No CTA buttons. No sticky call element. Duplicate content with all other pages to crawlers.	HIGH — is the only page that partially renders to crawlers but still missing critical on-page signals	Add LocalBusiness + Restaurant schema, FAQPage schema, BreadcrumbList. Enables rich results.	Add SSR/SSG. Unique title + meta. Schema. Sticky CTA. Map embed.
Menu /menu	Full menu display	Nav link exists. Category names are present in homepage shell.	Page content identical to homepage for crawlers. No prices. No item descriptions. No images with alt text. No MenuSection schema. No allergen info.	ZERO — no unique crawlable content	HasMenu / MenuSection schema enables menu rich results and AI food queries	Rebuild as SSR page. Unique H1. Full menu with descriptions and prices. MenuSection schema.
Locations /locations	Branch directory	8 branches named on homepage shell. Waze / HungerStation / Yango presence exists externally.	No individual branch pages. No NAP data (Name, Address, Phone). No map embeds. No hours per branch. No LocalBusiness schema. No directions.	ZERO — highest-value local SEO pages are completely absent	LocalBusiness schema per branch enables map pack results, voice answers, and GEO citations	Create /locations/[branch-slug] for each of 8 branches. Full NAP + schema + map embed.
FAQ /faq	Frequently asked questions	Nav link exists — signals awareness of FAQ value.	Page content identical to homepage for crawlers. Zero FAQ content	ZERO — a FAQ page that contains no questions loses all AEO	FAQPage schema is one of the most powerful AEO tools — each	Write 20+ Arabic Q&As. FAQPage schema. Internal links to branch and menu pages.

			exists. No FAQPage schema. No answer-engine optimization.	and featured snippet value	Q&A can appear as a featured snippet or AI answer	
Blog /blog	Content hub / SEO articles	Nav link exists. Blog category in navigation shows strategic intent.	No articles exist. Page returns homepage content. Zero crawlable blog content.	ZERO — enormous missed opportunity for keyword-rich content that feeds AI search engines	Blog articles are the primary fuel for GEO and AIO. Well-structured Arabic food content can rank and be cited.	Publish minimum 10 cornerstone articles. Arabic food + local Madinah content. Full schema.
Legal /legal	Legal & food safety hub	Food Safety Policy signal is a genuine trust differentiator. Nav placement shows priority.	Page content identical to homepage. No legal text exists in crawlable form. No Privacy Policy, Terms, Food Safety Policy text visible to crawlers or users.	MEDIUM — legal pages support E-E-A-T signals and GDPR/PDPL compliance	Food Safety Policy page can be cited by AI when users ask halal/safety questions	Create individual legal sub-pages. Full policy text. Appropriate schema. PDPL compliance.
About [missing]	Not present	Brand story elements exist on homepage (founded in Madinah, passion for food).	No dedicated About page. No brand history. No founder story. No team. No mission. Weak E-E-A-T.	MEDIUM — About page supports E-E-A-T and brand entity signals for AI search	AboutPage schema + brand entity signals help AI systems understand and cite the brand	Create /about with brand story, mission, history, and team.
Order / Delivery [missing]	Not present	HungerStation and Yango delivery presence exists externally.	No dedicated order/delivery page. No delivery platform links. Users cannot order from the website. Massive conversion gap.	HIGH — delivery intent queries (توصيل بروست سارة) have no landing page to rank for	Delivery page with platform links can rank for delivery queries and appear in AI food delivery answers	Create /order page linking to HungerStation, Yango, and direct call per branch.
Sitemap.xml [status unknown]	Crawler navigation aid	Domain is accessible.	Cannot confirm sitemap exists or is submitted to Google Search Console.	HIGH — without a sitemap, Google cannot discover and index sub-pages even after SSR fix	Sitemap signals page hierarchy to AI crawlers	Generate XML sitemap. Submit to Google Search Console and Bing Webmaster Tools.
robots.txt [status unknown]	Crawler instruction file	Domain accessible.	Cannot confirm robots.txt exists or whether it blocks crawlers inadvertently.	CRITICAL — a misconfigured robots.txt can block all crawling	robots.txt must allow AI crawlers (GPTBot, ClaudeBot, PerplexityBot) explicitly	Create/audit robots.txt. Explicitly allow key AI crawlers. Disallow admin paths only.

B3. Current Site Strengths Summary

- Strong brand name (بروست سارة) with clear Madinah positioning
- Primary Arabic keyword (أفضل برست في المدينة المنورة) already in H1 on homepage
- 8 branches listed — good geographic spread across Madinah and Yanbu
- Halal credential explicitly stated (100% fresh, never frozen, daily slaughter)
- Food Safety Policy navigation presence — a rare differentiator in the restaurant category
- Delivery platform presence on HungerStation and Yango (external listings exist)
- Navigation structure covers all key page types — the intent is right, execution is missing
- Signature product differentiation (الحراق / spicy broast, صلصة الثوم / garlic thoum sauce, شاورما السروخ / Sarookh shawarma)

B4. Current Site Weaknesses Summary

- CRITICAL: SPA rendering — 100% of sub-page content is invisible to all crawlers
- CRITICAL: Every URL returns identical meta title, H1, and body content
- CRITICAL: Zero schema markup of any kind detectable server-side
- HIGH: No individual branch location pages with NAP data
- HIGH: No FAQ content — FAQ page is an empty shell
- HIGH: No blog articles — blog page is an empty shell
- HIGH: No legal page content — legal page is an empty shell
- HIGH: No sticky click-to-call or order button for mobile users
- HIGH: No Open Graph or Twitter Card metadata
- MEDIUM: No hreflang tag for Arabic language targeting
- MEDIUM: No canonical tags
- MEDIUM: No About page for brand E-E-A-T
- MEDIUM: No dedicated delivery/order page
- LOW: Image file names and alt text unverifiable (no server-side HTML images beyond logo)

C. Site Architecture Recommendation

C1. Recommended URL Structure

URL	Arabic Name	Priority
/	الرئيسية — Home	**P1 — Immediate**
/menu	قائمة الطعام — Menu	**P1 — Immediate**
/locations	دليل الفروع — Branch Index	**P1 — Immediate**
/locations/al-aziziyyah	فرع العزيزية	**P1 — Immediate**
/locations/al-hijrah	فرع الهجرة	**P1 — Immediate**
/locations/ad-difa-al-boukhari	فرع الإمام البخاري — الضيافة	**P1 — Immediate**
/locations/al-jumuah-hil-bahr	فرع حي البحر — الجمعة	**P1 — Immediate**
/locations/ar-rawabi-aljwazat	فرع الجوازات — الروابي	**P1 — Immediate**
/locations/az-zahrah-al-juruf	فرع الجرف — الزهراء	**P1 — Immediate**
/locations/abiar-al-mashi	فرع أبيار الماشي)24/7(	**P1 — Immediate**
/locations/yanbu	فرع ينبع	**P1 — Immediate**
/order	اطلب الآن — Order Now	**P1 — Immediate**
/faq	الأسئلة الشائعة — FAQ	**P1 — Immediate**
/about	من نحن — About	P2 — Month 1
/blog	المدونة — Blog Index	P2 — Month 1
/blog/[article-slug]	مقالات — Blog Articles	P2 — Month 1
/legal	القانونية — Legal Hub	P2 — Month 1
/legal/privacy-policy	سياسة الخصوصية — Privacy Policy	P2 — Month 1
/legal/terms	الشروط والأحكام — Terms	P2 — Month 1
/legal/food-safety	سياسة سلامة الغذاء — Food Safety	P2 — Month 1
/legal/refund-policy	سياسة الاسترجاع — Refund Policy	P2 — Month 1
/offers	العروض والتخفيضات — Offers	P3 — Month 2
/offers/ramadan	عروض رمضان — Ramadan Offers	P3 — Seasonal
/offers/hajj	عروض الحج — Hajj Offers	P3 — Seasonal

C2. Main Navigation Structure

The recommended primary navigation for desktop and mobile (hamburger menu) is:

- الرئيسية / Home → /
- قائمة الطعام / Menu → /menu

- فروعنا / Our Branches → /locations (with dropdown to individual branch pages)
- اطلب الآن / Order Now → /order (highlighted in brand red — primary CTA)
- الأسئلة الشائعة / FAQ → /faq
- المدونة / Blog → /blog
- من نحن / About → /about

WHY: Arabic users navigate right-to-left. The CTA 'Order Now' must be visually prominent. Branch discovery is typically the second-highest intent after ordering. The current navigation order (Home > Menu > Branches > FAQ > Blog > Legal) is broadly correct but lacks the Order page and buries the conversion action.

C3. Footer Navigation Structure

- Legal Hub: Privacy Policy · Terms & Conditions · Food Safety Policy · Refund Policy
- Branch Directory: Links to all 8 individual branch pages
- Social Links: Snapchat · Instagram · TikTok (where active)
- Delivery Platforms: HungerStation · Yango (with SVG icons)
- NAP Footer Block: Full name, city (المدينة المنورة), general phone number
- Copyright + registered name in Arabic and English

C4. Internal Linking Standards

- Every branch page links back to /locations (canonical branch index)
- Every branch page links to /menu and /order
- Homepage links to all 8 branch pages individually
- FAQ page links to relevant branch, menu, and order pages inline
- Blog articles link to at minimum 2 branch pages and 1 menu section per article
- Legal pages link to homepage and About page
- /order page links to each delivery platform and to each branch phone number

D. Page-by-Page Content Strategy

D1. Home Page — الصفحة الرئيسية

Purpose	Convert first-time visitors into callers or orderers. Establish brand authority. Surface all primary keywords in crawlable HTML.
Target Audience	Arabic-speaking Madinah residents. Pilgrims and visitors (Hajj/Umrah seasons). Late-night diners. Families ordering delivery.
Primary Keyword	أفضل برست في المدينة المنورة [best broast in Madinah]
Secondary Keywords	بروست سارة | دجاج مقرمش المدينة | توصيل بروست المدينة | فروع بروست سارة | منيو بروست سارة
Schema Types	Restaurant + LocalBusiness + FAQPage (3 top questions) + BreadcrumbList
Primary CTA	اطلب الآن / Order Now — links to /order page
Secondary CTA	اعرض الفروع / View Branches — links to /locations
Mobile Behaviour	Sticky bottom bar: Phone icon (click-to-call) + Order Now button. Above fold: H1 + 2 CTAs + trust badge only.
Trust Signals	100% حلال badge. سلامة الغذاء / Food Safety badge. Year established. Branch count. Daily fresh chicken statement.

D1-A. Recommended Homepage Content Blocks

- BLOCK 1 — Hero: H1 in Arabic, subheadline, 2 CTAs, halal trust badge. Mobile-first above fold.
- BLOCK 2 — Why Broast Sara: 4 icons (Fresh · Halal · Fast · Trusted). Short Arabic copy per point.
- BLOCK 3 — Signature Products: 3–4 hero dishes with photo, Arabic name, 1-line description.
- BLOCK 4 — Branch Map Strip: Google Maps embed + quick list of 8 branches with phone links.
- BLOCK 5 — Order Delivery: HungerStation + Yango buttons with platform logos.
- BLOCK 6 — Food Safety Trust: Short paragraph referencing the food safety policy + link.
- BLOCK 7 — FAQ Teaser: 3 top FAQ questions (FAQPage schema). Feeds Google FAQ rich results.
- BLOCK 8 — Blog Teaser: Latest 3 blog post cards. Drives internal link equity.

D2. Menu Page — قائمة الطعام

Purpose	Show full menu in crawlable HTML. Rank for menu query keywords. Enable AI to cite specific items.
Primary Keyword	منيو بروست سارة [Broast Sara menu]
Secondary Keywords	أسعار بروست سارة | وجبات بروست | برست حراق | شاورما سروخ | دجاج مقرمش

Schema Types	Menu + MenuSection + MenuItem with price, description, and image URL
Content Requirements	Each category as an H2. Each item as H3 or structured list with: Arabic name, description, price range, image.
Categories to Include	وجبات البروست الأصلي | البروست الحراق | الشاورما الأسطورية | الأطباق العربية | برجر الدجاج النجيتس الذهبية | الجمبري الذهبي

D3. Branch Location Pages — صفحات الفروع

Purpose	Rank for 'near me' and neighborhood queries. Provide NAP for Google Maps and voice search. Convert branch-level intent into calls and visits.
Primary Keyword Pattern	بروست سارة [حي/منطقة] | [مثلاً: بروست سارة العزيزية] [Broast Sara Al Aziziyyah]
Schema Types	LocalBusiness (subtype: Restaurant) with full address, geo coordinates, telephone, openingHoursSpecification, menu, image
NAP Format	Name: بروست سارة — فرع [X] | Address: Full Arabic address with neighborhood and city | Phone: +966-XXX-XXX-XXXX
Required Page Elements	H1 with branch name · Full address · Phone (click-to-call) · Hours table · Google Map embed · Order buttons · Menu excerpt · Nearby landmarks · Internal links
Conversion Goals	Click-to-call · HungerStation click · Waze/Google Maps click · WhatsApp order

D3-A. Individual Branch Pages Required

- بروست سارة — فرع العزيزية → /locations/al-aziziyyah
- بروست سارة — فرع الهجرة → /locations/al-hijrah
- بروست سارة — فرع الإمام البخاري (الضيافة) → /locations/ad-difa-al-boukhari
- بروست سارة — فرع حي البحر (الجمعة) → /locations/al-jumuah-hil-bahr
- بروست سارة — فرع الجوازات (الروابي) → /locations/ar-rawabi-aljwazat
- بروست سارة — فرع الجرف (الزهراء) → /locations/az-zahrah-al-juruf
- بروست سارة — فرع أبيار الماشي (مفتوح 24/7) → /locations/abiar-al-mashi
- بروست سارة — فرع ينبع → /locations/yanbu

D4. FAQ Page — الأسئلة الشائعة

Purpose	Answer the most common user questions about Broast Sara in crawlable HTML. Capture featured snippets. Feed AI answer engines.
Primary Keyword	أسئلة شائعة بروست سارة [Broast Sara FAQ]
Schema Type	FAQPage schema — each Q&A as Question + AcceptedAnswer

AEO Strategy	Each answer should be 40–60 words, self-contained, and answer the exact question asked. Include branch, hours, halal, delivery, and menu answers.
Internal Links	Each answer should link to the most relevant page: branch answers → branch page; delivery answers → /order; menu answers → /menu
Target Questions	20+ questions covering: hours, halal status, delivery, branches, menu items, prices, food safety, reservations, dietary needs

D4-A. Recommended FAQ Topics and Sample Questions

Category 1 — Branch & Location Questions:

- أين يوجد أقرب فرع بروست سارة؟ [Where is the nearest Broast Sara branch?]

D6. Legal Pages — الصفحات القانونية

Privacy Policy (سياسة الخصوصية)	Required under Saudi PDPL (Personal Data Protection Law). Covers: data collected, how it is used, third-party platforms (HungerStation, Yango), user rights, contact details for data inquiries.
Terms & Conditions (الشروط والأحكام)	Governs use of the website. Covers: ordering process, pricing, allergen disclaimer, branch-level service variations, intellectual property.
Food Safety Policy (سياسة سلامة الغذاء)	HIGHEST SEO VALUE of all legal pages. Covers: daily slaughter and freshness guarantee, halal certification, HACCP compliance, storage temperatures, staff hygiene protocols, allergen management.
Refund & Cancellation Policy (سياسة الاسترجاع)	Covers: order cancellation windows, refund eligibility, delivery platform-specific policies, complaint process.
Cookie Policy (سياسة الكوكيز)	Required if site uses analytics or tracking cookies. Covers: which cookies are used, opt-out mechanism, third-party analytics.
SEO Notes	Legal pages should link to each other from the legal hub. Food Safety Policy earns E-E-A-T trust signals. All legal pages should have unique title tags and meta descriptions.

E. Detailed Page Template Drafts

E1. Home Page Draft — الصفحة الرئيسية

Title Tag: بروست سارة — Broast Sara | أفضل برست في المدينة المنورة

Meta Description: استمتع بأفضل برست ودجاج مقرمش في المدينة المنورة. بروست سارة — 8 فروع في المدينة وينبع، توصيل عبر هنقرستيشن ويانغو، دجاج طازج حلال 100٪ يومياً. اطلب الآن!

H1:

بروست سارة — أفضل برست طازج وحلال في المدينة المنورة

[Broast Sara — Best Fresh Halal Broast in Madinah]

Hero Subheadline (H2 or large paragraph):

دجاجنا يُذبح يومياً ويُقدَّم طازجاً مقرمشاً في 8 فروع عبر المدينة المنورة وينبع. اطلب الآن عبر هنقرستيشن أو يانغو أو تواصل معنا مباشرة.

[Our chicken is slaughtered daily and served fresh and crispy across 8 branches in Madinah and Yanbu. Order now via HungerStation, Yango, or call us directly.]

CTA BUTTONS:

- [اطلب الآن — Order Now] → /order (Primary — brand red)
- [اعرض الفروع — View Branches] → /locations (Secondary — outlined)

H2 — لماذا بروست سارة؟ [Why Broast Sara?]

Four trust pillars — each with icon, Arabic heading, and 1-line Arabic copy:

هل الدجاج طازج أم مجمد؟	Is the chicken fresh or frozen?	FAQ + Food Safety	FAQ answer, Home H2	High

G. Technical SEO & AI-Search Requirements

G1. Rendering & Infrastructure — CRITICAL FIRST STEP

The single most important technical action is migrating from a client-side-only SPA to a framework that supports Server-Side Rendering (SSR) or Static Site Generation (SSG). Recommended frameworks: Next.js (React) with SSR/SSG, Nuxt.js (Vue) with SSR, or Astro. Without this change, ALL other SEO improvements are irrelevant — crawlers cannot see them.

G2. Technical SEO Checklist

Canonical Tags	Each page must declare its own canonical URL: <link rel="canonical" href="https://broastsara.com/[page]">. Resolve www vs non-www with 301 redirect to chosen canonical domain.
hreflang	<link rel="alternate" hreflang="ar-SA" href="..."> on every page. If English pages are added later, include hreflang="en" variants.
robots.txt	Allow: / for all bots. Explicitly allow: Googlebot, Bingbot, GPTBot (ChatGPT), ClaudeBot (Anthropic), PerplexityBot, CCBot, AmazonBot. Disallow: /admin, /api/private only.
XML Sitemap	Auto-generated sitemap.xml listing all crawlable pages with lastmod dates. Submit to Google Search Console, Bing Webmaster Tools. Update on every content change.
Page Speed	Target: LCP < 2.5s on mobile. Use: WebP images, lazy loading, CDN for static assets, preload for above-fold images. Compress JavaScript bundles.
Core Web Vitals	LCP, CLS, INP must all be in 'Good' range. Test with PageSpeed Insights (mobile device, Madinah proxy if possible).
HTTPS	Full HTTPS on all pages. No mixed content. Redirect all HTTP to HTTPS.
Structured Data / Schema	Restaurant schema on homepage and all branch pages. FAQPage on FAQ page, Home, and each Blog article. Article schema on Blog posts. MenuSection + MenuItem on Menu page. BreadcrumbList on all non-home pages. LegalService schema on Legal pages.
Open Graph	og:title, og:description, og:image, og:url, og:type on every page. og:locale: ar_SA. Twitter:card: summary_large_image.
Image SEO	All food images: descriptive Arabic alt text. File names in English slug format (broast-sara-crispy-chicken-madinah.webp). Use WebP format. Serve via CDN.
RTL Support	<html lang="ar" dir="rtl"> at document root. All CSS must support RTL. No LTR-only layouts. Test on actual Arabic OS settings.
Mobile-First	Viewport meta tag. Minimum 48px tap targets. Sticky bottom CTA bar on mobile (Call + Order). No horizontal scroll. Font size minimum 16px.

Tracking	Google Analytics 4 + Google Search Console. Conversion events: Click-to-call, HungerStation click, Yango click, Directions click, WhatsApp click. Saudi PDPL compliant consent banner.

G3. AI-Search Optimization Requirements

- FACT-DENSE ANSWERS: Every FAQ answer must be 40–80 words and answer the question completely in the first sentence. AI systems extract the most direct, self-contained answers.
- STRUCTURED CONTENT: Use HTML ordered and unordered lists, definition-style pairings (question: answer), and tables where appropriate. Structured content is easier for AI to parse and cite.
- BRAND ENTITY SIGNALS: Include the brand name (بروست سارة / Broast Sara) in the first 100 words of every page. Include city name (المدينة المنورة / Madinah) in H1 or first paragraph of all local pages.
- TOPICAL AUTHORITY: The blog strategy (10+ articles in 90 days) builds topical authority that makes the brand more likely to be cited by generative AI when users ask about broast in Madinah.
- ALLOW AI CRAWLERS: Ensure robots.txt explicitly allows GPTBot, ClaudeBot, PerplexityBot, and CCBot. These crawlers index content for AI systems. Blocking them removes the brand from AI search results.
- KNOWLEDGE GRAPH SIGNALS: Submit and verify Google Business Profile for each branch. Consistent NAP across all platforms. Wikipedia or Wikidata entries if the brand qualifies. These signals help AI systems understand the brand entity.
- E-E-A-T SIGNALS: About page with brand history. Named food safety officer. Clear contact information. Links to and from reputable local directories. Reviews on Google Maps with owner responses.

H. Content & Heading Rules

H1. Heading Hierarchy Rules

- ONE H1 per page only — the primary keyword for that page, in Arabic.
- H2s mark major content sections — use for each content block on the page.
- H3s mark sub-sections within H2 blocks — use for individual FAQ questions, menu items, branch details.
- Never skip levels: do not jump from H1 directly to H3.
- H1 must contain the page's primary Arabic keyword naturally — not stuffed.

H2. Arabic Keyword Usage Rules

- Keep all Arabic search terms in Arabic script — do not romanize (no 'broast sara' when Arabic users would type بروست سارة).
- Use Arabic keywords in H1, H2, first paragraph, meta title, meta description, image alt text, and schema name fields.
- Arabic text must be linguistically correct Modern Standard Arabic or local Hejazi dialect as appropriate to tone.
- Avoid keyword stuffing — each keyword should appear naturally 2–4 times per page for primary keywords.

H3. Tone & Voice Rules

- Primary voice: warm, trustworthy, locally proud — the brand speaks like a Madinah institution, not a global franchise.
- Halal credential must be stated naturally and early — not as a disclaimer but as a point of pride.
- Food descriptions must be sensory and appetising — المقرمش (crispy), الذهبي (golden), الطازج (fresh), اللذيذ (delicious) — applied specifically, not generically.
- Legal pages: formal, clear Arabic. No marketing language. Accessible to a general adult Saudi reader.
- Blog: conversational, informative, engaging. Written as if by a knowledgeable food lover in Madinah.

H4. Content Length Guidelines

Page Type	Minimum Word Count	Note
Homepage	**500 words (Arabic)**	Quality over quantity — conversion focus
Branch page	**400 words (Arabic)**	NAP + hours + map are core; copy supports
Menu page	**300 words copy + all item descriptions**	Schema-rich; items counted separately
FAQ page	**800–1200 words total**	20+ Q&A pairs; each answer 40–80 words

Blog article	**800–1500 words (Arabic)**	Longer for competitive queries
Legal pages	**500–1500 words each**	Comprehensive but readable
About page	**400–600 words**	Brand story; E-E-A-T focused

I. Priority Roadmap — 30 / 60 / 90 Days

Every task in the roadmap below assumes the SPA rendering fix (Task 1) is the absolute first action. No other SEO or content work will deliver results until search engines and AI crawlers can see the actual page content. The 30-day sprint is dominated by technical work and foundational content.

Days 1–30: Critical Foundation

30-DAY TASKS (Days 1–30)	Owner	Effort	Impact	Benefit
1. Migrate site to SSR/SSG framework (Next.js recommended)	Dev team	HIGH	CRITICAL	Makes all pages crawlable — prerequisite for everything below
2. Implement unique title tag + meta description per page	Dev + SEO	LOW	HIGH	Improves CTR in SERPs immediately upon indexing
3. Add canonical tags and hreflang ar-SA to all pages	Dev	LOW	HIGH	Prevents duplicate content issues
4. Create and submit XML sitemap to GSC and Bing Webmaster	Dev + SEO	LOW	HIGH	Accelerates indexing of all pages
5. Audit and fix robots.txt — allow all AI crawlers	Dev	LOW	HIGH	Ensures AI systems can crawl and cite the site
6. Implement Restaurant + LocalBusiness schema on homepage	Dev + SEO	MEDIUM	HIGH	Enables rich results and AI entity recognition
7. Create 8 individual branch pages with full NAP + hours + map	Dev + Content	HIGH	CRITICAL	Local SEO map pack rankings; 'near me' query capture
8. Add LocalBusiness schema to each branch page	Dev + SEO	MEDIUM	CRITICAL	Powers Knowledge Panel and voice search answers
9. Implement mobile sticky CTA bar (Call + Order Now)	Dev + UX	LOW	HIGH	Immediate conversion lift on mobile traffic
10. Set up Google Analytics 4 with conversion event tracking	Dev + Analytics	MEDIUM	HIGH	Enables data-driven optimization from day 1
11. Verify Google Business Profile for all 8 branches	Marketing	LOW	CRITICAL	Map pack rankings and Knowledge Panel control

Days 31–60: Content & AEO Buildout

60-DAY TASKS (Days 31–60)	Owner	Effort	Impact	Benefit
12. Build full Menu page with all items, descriptions, prices, schema	Content + Dev	HIGH	HIGH	Ranks for menu queries; enables MenuItem rich results

13. Write and publish FAQ page — 20+ Q&A pairs with FAQPage schema	Content + Dev	MEDIUM	CRITICAL	Featured snippets + AI answer citations immediately
14. Create /order page with all delivery platform links and branch phones	Dev + Content	LOW	HIGH	Captures high-intent delivery query traffic
15. Publish Food Safety Policy page (full content)	Content + Legal	MEDIUM	HIGH	E-E-A-T trust signal; AI halal/safety query citations
16. Publish Privacy Policy and Terms & Conditions (Arabic)	Content + Legal	MEDIUM	MEDIUM	PDPL compliance; legal page E-E-A-T signals
17. Create About page with brand story and founder narrative	Content	LOW	MEDIUM	Brand entity signals for AI; E-E-A-T improvement
18. Publish first 5 blog articles (Arabic, with schema)	Content	HIGH	MEDIUM	Long-tail keyword traffic; topical authority building
19. Add Open Graph and Twitter Card metadata to all pages	Dev	LOW	MEDIUM	Social sharing CTR improvement
20. Implement BreadcrumbList schema on all non-home pages	Dev	LOW	MEDIUM	Breadcrumb rich results in SERPs
21. Add FAQPage schema to homepage (3 top questions)	Dev + SEO	LOW	HIGH	Homepage FAQ rich results immediately

Days 61–90: Authority, Scale & AIO

90-DAY TASKS (Days 61–90)	Owner	Effort	Impact	Benefit
22. Publish 5 more blog articles — reach 10 total	Content	HIGH	MEDIUM	Topical authority consolidation; GEO citation frequency
23. Build Offers/Seasonal pages (Ramadan, Hajj/Umrah)	Content + Dev	MEDIUM	HIGH	Seasonal keyword rankings; AI seasonal query citations
24. Collect and publish Google Reviews responses on GBP	Marketing	ONGOING	HIGH	E-E-A-T signals; map pack ranking factor
25. Add aggregateRating schema to homepage once 10+ reviews	Dev + SEO	LOW	HIGH	Star rating rich results in SERPs
26. Submit Wikidata/Wikipedia brand entry if eligible	SEO	MEDIUM	MEDIUM	Brand entity knowledge graph recognition
27. Conduct Core Web Vitals audit and fix failing metrics	Dev	MEDIUM	HIGH	Page experience ranking factor improvement
28. A/B test homepage CTAs (Order Now vs Call Now prominence)	Dev + Marketing	MEDIUM	MEDIUM	Conversion rate optimization
29. Build link outreach to Madinah food and tourism sites	SEO + Marketing	HIGH	MEDIUM	Domain authority growth; AI citation credibility
30. Full GSC performance audit — identify ranking opportunities and gaps	SEO	LOW	HIGH	Data-driven next-quarter strategy

I-Summary. Impact Matrix

Expected outcomes if roadmap is executed with fidelity: • Day 30: Site becomes fully crawlable. Branch pages indexed. Initial GBP map pack appearances. • Day 60: FAQ featured snippets begin appearing. Menu rich results live. Delivery page ranking for order queries. • Day 90: First-page rankings for primary brand and local keywords. AI Overviews begin citing Broast Sara for Madinah broast queries. Blog articles generating organic traffic. Food Safety Policy page cited in halal/safety AI answers. • Day 120+: Full topical authority established. Consistent map pack position for all 8 branch neighborhoods. AIO / GEO citations regular.
